

PRESS RELEASE

RDS wins RASE Silver Medal at Royal Show

Even the weather couldn't take the shine off the RDS Weighlog 200 at the recent Royal Show where the company was awarded the RASE Machinery Award Scheme Silver Medal. These awards are unique as they are based on rigorous usage by commercial users and as such winners have proved their quality engineering over a period of time. It was the robust electronic pressure sensors that provide consistently accurate weight measurement that saw the judges choose the Weighlog 200.

RDS Managing Director Richard Danby (pictured) received the award from HRH the Countess of Wessex and agreed with the judges that it was the "simple design and rugged construction that allowed the Weighlog 200 to perform so well over such an extended period of time."

The Weighlog 200 takes a pressure reading off the lift hydraulics and turns this into an electronic reading in an instrument that offers multiple channels for different attachments, products or any other category you care to use and it also offers the option of a live reading to enable trailer weighing; all of which make it an award winning product that is ideal for all kinds of agricultural applications.

RDS Technology Ltd - leading monitor and control technology into the 21st Century
